

# Outdoor Event Rider

*The purpose of this rider is to inform the Presenter of the risks and requirements of sponsoring an outdoor bubble event. Outdoor events, particularly those without alternative back-up indoor facilities, are risky due to unforeseen weather conditions. This rider has been created to assist Presenters in recognizing the risks involved, how to assess them and how to be prepared.*

## **Weather**

1. For safety purposes, Artists will not be expected to perform when there is lightning or thunder in the vicinity.
2. When precipitation poses a safety threat to the Artist or equipment, it is at the Artist's discretion to determine the necessary measures that are required to perform safely.
3. For the safety of the Artists and their equipment, Artists will not be obligated to perform in extreme heat or cold.
4. It is understood that Bubbles are a very sensitive medium and sometimes conditions of extreme low humidity or strong winds can make producing Bubbles more difficult. We are prepared to produce Bubbles under most conditions, but the weather elements beyond our control most definitely can affect the Artists' ability to produce Bubbles, as well as their size and longevity. Artists will try their best to produce Bubbles under most conditions, but some elements are beyond our control.
5. Regardless of the weather conditions or if unsafe conditions prevent the Artist from performing, the full contracted amount is due to the Artist upon demand.

## **Accessibility**

The Presenter is to provide parking, any required parking passes and an unrestricted path for the Artist to access the performing area. When quick, easy access is not provided, motorized transportation must be provided by the Presenter.

AGREED TO AND ACCEPTED BY:

*Presenter's Initials*
